

BLIN

DATA ROOM

HIGHEST SECURITY STANDARDS FOR YOUR DATA

Imagine a data room in which you can manage all due diligence documents thanks to a dedicated online platform. Data protection is combined with user-friendliness and through customized accesses you can consult your documents via PC or tablet. BLIN DATA ROOM makes it possible.

www.blindataroom.com

AN ONLINE PLATFORM WHERE SECURITY IS A PRIORITY

The main purpose of BLIN DATA ROOM is to protect the data shared (security by-design). Access to software functions is based on roles and customized authorizations. All documents are encrypted and can be customized with watermarks. Every action related to security that has been performed, is chronologically registered in the audit log of the system.

A TAILOR-MADE SOLUTION THAT CAN MEET ALL YOUR NEEDS

Users can access one single customized platform specific for every project (acquisitions, transfers, quotations, obligations and so on...). Users can only view those documents that they are allowed to read and can always consult up-to-date data having a 24/7 availability.

DATA CONSULTATION IS EASY AND FAST

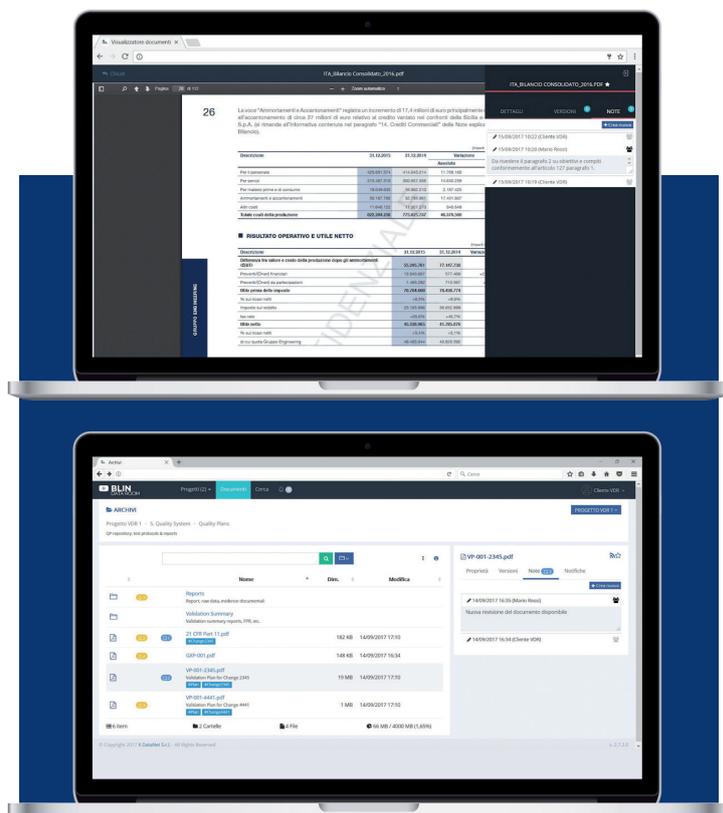

Users can access the platform via PC, tablet or smartphone using the browser they prefer. BLIN DATA ROOM is easy and intuitive, you do not need to have specific IT skills to understand how it works. In addition, the full-text search feature helps in quickly finding the data you are looking for.
